

ORION
ENGINEERING WEIGH

- Ultima + SPI Incorporates high speed M-D Aq Anaog to digital conversation.
- Suitable the batching system, filling application and control weighing, Set Point application and so on.
- 3 Set point relay output.
- Readability 1 / 30000
- 5 Point no linearity correction.
- Auto Zero tracking
- Accuracy class III
- Input signal range :- 19mv to + 19mv
- Full span corrections < 8ppm/°C
- Long Distance compensation (6 wire connection)
- Scale Interval 1/2/5/10/20/50/100
- 5 Soft Membrane Keys
- Relay Output 230V.0.5A
- Power Supply 230 VAC, 50Hz
- Interchangeable without recalibration
- Easy to me front panel setting
- Standard RS232 interface
- Standard Remote display interface.
- 24 bit A/D Conversion
- Conversion speed 80 times
- Loadcell Excition 5V-350MA
- 8 Load cells can be connected
- RTC
- Displaces 7 digit LED and 11 Status LEDS
- Op. Range 0-40°C
